PLASTIC AND RECONSTRUCTIVE SURGERY

DIPLOMATE AMERICAN BOARD OF PLASTIC SURGERY

## PATIENT SAFETY

- Hands free gel sanitizer units for hand hygiene are available throughout the office for use by patients and staff. We follow the World Health Organization (WHO) guidelines and perform hand hygiene before and after coming in contact with every patient.
- Masks are available for patient use if desired. Staff will use masks on patient request.
- All treatment areas, frequently touched surfaces, and the bathroom are thoroughly cleaned and sanitized between patient visits and throughout the day.
- We have installed **Surgically Clean Air**, a state-of-the-art air cleaning system to completely clean the office air of all potential aerosolized viruses and bacteria multiple times every hour and every 3 minutes in the operating room.

**In accordance with the highest standards for patient care and safety, Dr. Forley's office-based surgical facility is accredited by the Joint Commission. "The Joint Commission is an independent, not-for-profit organization that evaluates and accredits more than 15,000 health care organizations and programs in the United States. It is the nation's predominant standards-setting and accrediting body in health care."**
